DETAILED ACTIONS

EXAMINER'S AMENDMENT

1. Applicant's election of claims **16-17, 19-20** is acknowledged. Because Applicant did not distinctly and specifically point out the supposed error in the restriction requirement,

the election has been treated as an election without traverse (MPEP § 818.03(a)).

Applicant have the right to file a divisional application covering the subject matter of the non-elected claims 18, 21-35.

The traversal is on the ground(s) that see the election paper. This is not found persuasive because the fields of search for method' and device claims are NOT coextensive and the determinations of patentability of method and device claims are different, that is process limitations and device limitations are given weight differently in determining the patentability of the claimed inventions. Also, the strategies for doing text searching of the device claims and method claims are different. Thus, separate searches are required.

The requirement is still deemed proper and is therefore made **FINAL**.

2. An examiner's amendment to the record appears below. Should the change and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel claims 18, 21-35.

REASONS FOR ALLOWANCE

3. Claims 16-17, 19-20 are allowed.

4. The following is an examiner's statement of reasons for allowance: None of the references of record teaches or suggests a cited in claims 16, 19: a carrier including a substrate and a dielectric film, and microjoint receptacles comprising an adhesion layer, diffusion barrier layer, and a noble metal layer; microjoint pads on the device side comprising an adhesion layer, solder reaction barrier layer and fusible solder joint ball for each component; said microjoint pads on the device on the carrier side matching said microjoint receptacles on the carrier side.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

CONCLUSION

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Margerlein et al (6,661,098 B2): High Density Area Array Solder Microjoining Interconnect Structure and Fabrication Method.
